

# ROOMZ DISPLAY

# e-shelf-labels

## Optimize the usage of your rooms

The ROOMZ display does justice to the agile and smart workplace concept of the future without great installation effort. Via the linked calendar management, appointments are played out and displayed on the ROOMZ display. So it is immediately visible which rooms are free. Simple functions are available via a touch panel, which you can configure, book and release for each display yourself. Spontaneous reservations are so easy to handle.

## ADVANTAGES

- || Resource-saving, digital room management
- || Energy-saving e-paper technology
- || Flexible booking thanks to touch function
- || Battery life up to 4 years

Easy installation without cables and drilling

Intuitive operation with touch functions

Simple design with aluminium frame

Clear information on occupancy and following dates

Mountable on all surfaces: glass, wood, masonry

Multi-View with daily and weekly overview

# TECHNICAL DATA e-shelf-labels

## ROOMZ Sensor and ROOMZ Analytics

In addition to the display system, you can purchase additional features.

The **ROOMZ sensor** records anonymously and discretely whether rooms or workstations are currently occupied. So called ghost meetings can be quickly identified and removed from the calendar. The workstation occupancy is also registered. This simplifies the administration in alternative workstation models. **ROOMZ Analytics** also provides statistical data that helps to optimize room and workstation usage.
